EDUCATION

SRM Institute of Science and Technology **2018 - 2022**
B.Tech Computer Science Engineering
CGPA (Till 6th Semester): 9.02

Good Earth School (SSC/HSC) **2004 – 2018**
Graduated with a score of 98% in Computer Science

WORK EXPERIENCE

Full Stack Development Intern
Scholarly Science | Nov. 2020 – Dec. 2020

Worked on developing both the frontend and backend of a React SPA used by recruiters to hire college graduates. Built the frontend using React (with Redux) and the backend API using NodeJS, Express and MongoDB (with the Mongoose ODM).

PROJECTS

Neural Network Library for Java
Field: Artificial Intelligence and Machine Learning
Library to build and train artificial neural networks. Built from scratch with Java.

Discord Chat Bots
Field: Backend Development
Built as a job for a client with NodeJS and PostgreSQL. Uses the Google Sheets and Google Drive API. Hosted on Heroku.

Secure User Authentication Webpage
Field: Full Stack Development, Cyber security, Cryptography
Built a secure login site that uses all the industry standard web security practices like securing a connection with the backend using HTTPS with TLS, salting and hashing passwords using SHA-512 using PBKDF2 and handling user logins with JSON Web Tokens.

A* Pathfinding Algorithm Visualizer
Field: Data structures and Algorithms
Built a web based graphical application using p5.js that runs the A* pathfinding algorithm finding the optimal path from one point to another, avoiding obstacles in the way.

Publication – Neural Network Research Paper
Field: Artificial Intelligence and Machine Learning
Paper on a standardized file format to store and share neural network models. Won the **silver medal** at SRM Research Day 2020 and published in SSSTJ an international Science and Technology journal

TECHNICAL SKILLS

LANGUAGES
JavaScript, Java, C, C++, Python

TOOLS
NodeJS, Express, MongoDB, PostgreSQL, React, Git, Linux

CONCEPTS
Data Structures, Algorithms, Cryptography and Web Security, Cloud Computing, Software Engineering
